

～プラスチックはこう分ける～

Remember. after we take out our refuse, there are people who treat it by hand. So, please separate it correctly to be used as resources.

Recyclable Plastic Containers

To what extent do we have to Wash? Dry?

Recyclable plastic containers are resources. If it is dirty or wet, it can not be recycled. Dirty plastic gets moldy after one or two weeks in transit on the way to the recycling plant.

- Plastics soiled with heavy, oily substance is not helpful.
- You don't have to use detergents to rinse Recyclable Plastic Containers.
- It's OK to drain off the water by just shaking it.

For example...

Tube of wasabi, toothpaste, etc. : cut tube and rinse with hot water or use it up.

Food (For example cake, stew, curry, etc.) remaining on the Plate: rinse with hot water or wipe it off with paper or towel.

Trays of meat or fish : rinse with hot water.
